That's good, I am glad. =) I know I learned a lot from these resources and working down at this chemical leak in Charleston.

Hi Guys with the drought exercise, I thought that if you haven't seen these resources they may be good. Specifically the first link has a lot about water companies coordinating with emergency services.

Subject: tabletop exercise resources

Melissa,
Nice to hear that others are interested in the work EPA has done on training water utilities as well as local responders.

This page contains a wealth of information:
<http://water.epa.gov/infrastructure/watersecurity/emerplan/index.cfm#pp>

Scroll down to training to see the link to the CD of tabletop exercises (third bullet under training and exercises)

Here is the exact link: <http://water.epa.gov/infrastructure/watersecurity/techtools/ttx.cfm>
Folks just need to register to be able to download the tool.

The first link above also has links to the drinking water and wastewater tailored ICS and NIMS courses.
